< Take 2 Furosemide

Name: Furosemide

Type: Pharmacological

Form: Tablet

Strength: 40

Strength unit: mg

Instructions: Take 2 in the morning with food, 1 in the afternoon with food

What is furosemide?

Furosemide is a loop diuretic (water pill) that prevents your body from absorbing too much salt. This allows the salt to instead be passed in your urine.

Furosemide is used to treat fluid retention (edema) in people with congestive heart failure, liver disease, or a kidney disorder such as nephrotic syndrome.
